Catholic Retreat Centers- Multiple Locations

GEOGRAPHICAL AREA:

Irondale, Alabama
Manati, Puerto Rico

ISSUE:

Looking to insulate and protect the roof from mold and fading due to UV damage

SOLUTION:

Crystal clear mold resistant roof coating

Coverage: 2-coats

RESULTS:

- ✓ Provided clear insulation, keeping the look of the roof.
- ✓ Prevented mold growth, eliminating maintenance costs.
- ✓ Provided UV Resistance, keeping the tiles from fading over time.
- ✓ 10 year warranty

Award Winning Energy Saving and Asset Protection Coatings

When the Catholic Church was looking for a way to insulate and protect the roofs of two of their properties, they looked to a brand they had trusted in the past to lower energy costs in other facilities. They had been pleased with the performance of Nansulate® liquid insulation for walls, and so they chose to use Crystal clear insulating roof coating for the roofs of two of their retreat centers.

Casa Maria Convent & Retreat Center in Irondale, Alabama has a beautiful tile roof. The fact that the coating is clear, allowing the color of the roof to remain unchanged, was a huge benefit. And the clear thermal barrier coating also provided protection from mold growth, UV and weathering.

The other property was the Monasterio Madre de Dios, a monastery in Manati, Puerto Rico. This roof consisted of a portion that included metal roofing, which the coating can also be used for, providing corrosion prevention as an additional benefit.

The area coated for the entire project, including both roofs, was over 77,900 square feet. The project was completed in Fall of 2012.
