

CASE STUDY

National Naval Aviation Museum Lead Abatement

GEOGRAPHICAL AREA:

Pensacola Florida

ISSUE:

A new hangar was being put into use in the museum, but it had lead contamination in the floor that needed abatement

SOLUTION:

LeadX[™] clear lead encapsulation coating

Coverage: 2-coats

RESULTS:

- ✓ Safely encapsulated the lead
- ✓ Compatible to be over coated with a floor paint
- ✓ Easy and cost effective application
- ✓ Had been used by the U.S. Navy in previous projects
- ✓ 20-year warranty

Award Winning Energy Saving and Asset Protection Coatings

The National Naval Aviation Museum, which is the world's largest museum of naval aviation, was expanding to a new hangar and needed to abate lead on the hangar floor to make it safe for visitors.

LeadX[™] clear lead encapsulation coating by Synavax[™] was chosen because of its stellar reputation by the environmental contracting industry and due to its easy application, smooth finish, and ability to be over coated by an abrasion resistant floor coating.

The LeadX[™] lead abatement coating played an important role in making the hangar environmentally safe from lead exposure for the many museum visitors.
