

Case Study

Green Project Spotlight - Eco-Renovation Claremont, CA

GEOGRAPHICAL AREA:
Claremont, California

OVERVIEW:

If you're a fan of the Discovery Channel, you may have seen their 'Greenovate' eco-makeover show where Synavax's™ Energy Protect™ coating was used to increase energy efficiency and reduce energy costs for a Southern California homeowner.

SOLUTION:

Energy Protect™

Coverage: 3-coats

Applied to walls

RESULTS:

- ✓ Lowered energy costs in all seasons.
- ✓ Provided mold/mildew resistance.
- ✓ Offered an eco-friendly renovation option that was easily applied.
- ✓ Provided resistance to UV and moisture.
- ✓ Low VOC

Award Winning Energy Saving and Asset Protection Coatings

Our Energy Protect™ coating was featured in an eco-renovation of a Claremont, California home on an episode of Greenovate on the Discovery Network's Planet Green.

Greenovate follows homeowners doing eco-friendly home renovations to save money, reduce energy costs, and lower their carbon footprint.

Our clear Energy Protect™ insulation coating for homes and buildings was used to improve the home's insulation value and energy efficiency and also offered low VOC.
