

CASE STUDY

Residential Application-
Building Envelope- Interior
Walls and Attic

GEOGRAPHICAL AREA:
Sherman, Texas

ISSUE:

Traditional insulation on a new home had projected electric costs at \$450. Homeowner was looking to lower this expected cost.

SOLUTION:

HomeProtect[™] clear coat.

Coverage: 3-coats

RESULTS:

- ✓ Provided an alternative form of insulation that is easy to apply.
- ✓ The electric bill has not exceeded \$190 a month since April of 2007.
- ✓ Provided surface protection- resistance to mold, moisture and UV damage.
- ✓ Long lasting 5-10 years

Award Winning Energy Saving and Asset Protection Coatings

This new 4500 square foot home in Sherman, Texas was completed early in 2007. The architect projected a \$450 monthly electric bill with traditional insulation being used. The homeowner decided to add HomeProtect[™] into his new home specification, and had his contractor paint his interior walls and attic with HomeProtect[™] Clear Coat for added insulation and protection from moisture and mold.

His electric bill hasn't exceeded \$190 a month since April of 2007.
