

CASE STUDY

Oil and Gas Vessels Ontario, Canada

GEOGRAPHICAL AREA:

Ontario, Canada

ISSUE:

Insulate and provide corrosion resistance to oil and gas vessels.

SOLUTION:

Heat ShieldTM High Heat

Coverage: 8-coats

RESULTS:

- ✓ Reduced heat loss from piping
- ✓ Prevented corrosion and CUI
- ✓ Easy spray-on application
- ✓ Provided effective, moisture resistant insulation
- ✓ Longevity of 5-10 years
- ✓ No exterior covering needed
- ✓ Saved energy and lowered costs

Award Winning Energy Saving and Asset Protection Coatings

Johnson Group Contracting in Ontario, Canada used Heat ShieldTM High Heat thermal insulation and corrosion prevention coating to coat oil & gas vessels.

The company was pleased to use a solution that was resistant to corrosion and mitigated corrosion under insulation (CUI), while standing up well to extreme environments, with a longevity of 5-10 years without needing replacement.
