

CASE STUDY

US Army Corps of Engineers

GEOGRAPHICAL AREA:
Multiple US locations

ISSUE:

The U.S. Army Corps of Engineers needed a durable and long-term solution to pipe insulation and corrosion control.

SOLUTION:

Heat Shield[™] PT

Coverage: 2/3-coats

RESULTS:

- ✓ Pipe insulation- long term performance and durability.
- ✓ Corrosion and weathering resistance.
- ✓ Clear coating allows visual inspection of the underlying surface.
- ✓ Long lasting 5-10 years.

Award Winning Energy Saving and Asset Protection Coatings

Heat Shield[™] Translucent PT insulation and corrosion prevention coating provided an easy to install, and long-term solution for pipe insulation that retained insulating ability over time, and stood up to humid, wet and harsh environments.

Synavax[™] coatings have been used by several Army Corps of Engineer locations throughout the United States.
