RESULTS:

- ✓ Reduced heat gain
- ✓ Insulated home to keep it cooler
- ✓ Stood up to extreme Arizona climate
- ✓ Lowered heat in the garage by 15-20 degrees.

Award Winning Energy Saving and Asset Protection Coatings

Customer Quote:

“I used Energy Protect™ on my home in Lake Havasu, Arizona and it did wonders. It is 125 degrees outside much of the summer, although my home had 6 in insulation and a good overhang on the roof, it still got very hot.

I used your coating on my garage door that faced due west, brutal sun and heat, your coating kept the interior of my garage 15 to 20 degrees cooler than before, amazing.”
