

CASE STUDY

Frontier Produce Insulation of Refrigerated Van

GEOGRAPHICAL AREA:
Tulsa, Oklahoma

ISSUE:

Insulate refrigerated delivery van to become more fuel efficient and reduce load on the A/C unit.

SOLUTION:

Energy Protect™

Coverage: 3-coats

RESULTS:

- ✓ Improved gas mileage
- ✓ Reduced load on the A/C unit for cooling
- ✓ Mold/mildew resistant
- ✓ Low odor
- ✓ Low VOC
- ✓ Thin film insulation that did not require extra space
- ✓ No extra weight added to vehicle

Award Winning Energy Saving and Asset Protection Coatings

Frontier Produce in Tulsa, Oklahoma wanted to reduce the fuel used to cool the back of their delivery van and increase gas mileage of their vehicle. Energy Protect™ was used to insulate the interior walls and ceiling of the van to reduce heat gain and make the vehicle more fuel efficient.

The company also liked the fact that the Syneffex™ Energy Protect™ coating was water-based, low odor, low VOC and provided additional mold/mildew resistance to the van without added weight or taking up any extra space.
