EnergyProtect™

Coverage: 3-coats

RESULTS:

- ✓ Reduced internal temperatures of rabbit hutch.
- ✓ Provides mold and UV resistance.
- ✓ Long lasting 5-10 years.
- ✓ Clear coat keeps the look of the original structure.

"My wife breeds and shows rabbit as a hobby - your product was used to paint the interior of the building where her show rabbits are kept. Rabbits have little tolerance for high heat and keeping them cool during the summer months can be a major challenge. The building was noticeably cooler during the last heat wave which included record high temperatures."

Tim Elliott
Garden City, Missouri
